## VISION AND OVERVIEW

Nollars combines **Ethereum's Security** with **Layer 2 Scalability**, governed by the community through **NollarsDAO**.

- Nollars is a DeFi project that integrates with the secure Layer 1 of Ethereum and scales with Layer 2.

NollarsDAO will open the door for Nollars to offer its customers instant access, low-fee transactions, and 100% transparent community-driven governance.

Nollars is an all-in-one, secure, future-proof decentralized infrastructure supporting cross-chain interoperability, app development, and meme coin trading.

- The Nollars team will handle the deployment of the Layer 2 solution and token.

Following the project's launch, full governance will be handed over to NollarsDAO, which will help decide its future.

## KEY FEATURES

Nollars is the only project of its kind because it boasts several **brilliant features**:

1. Nollars Token: A native ERC-20 token on Ethereum Layer 1, which will move to our more scalable and cheaper Layer 2 solution with a cross bridge.
2. We also work on an in-house developed Layer 2 solution that runs through Nollars layer, leveraging rollup technology to bring fast and cheap transactions.
3. First of all, NollarsDAO is simply a token-holding DAO (this kind of structure conservation Tally Protocol) where every decision regarding the consensus concerning development and governance is reserved to its founder, who will be abandoned as soon as any essential former elements are realized about this project.
4. The NollarsDAO will handle and manage all of the Treasury Management for the project, and take full responsibility in preserving a long-term healthy and sustainable ecosystem.

# Ecosystem

## NOLLARS TOKEN

An **ERC-20** token on Ethereum **Layer 1**, transitioning to **Layer 2** for scalability and governance.

Nollars Token is the native asset for Nollars Network, initially deployed as an ERC-20 on Ethereum Layer 1.

- The token will be used for governance participation, development funding and liquidity.

The Token will be migrated to Layer 2 as Nollars transitions to the new technology so that users can benefit from faster and cheaper transactions.

It will also act as the governance token of NollarsDAO, allowing its holders to vote on important decisions.

## LAYER 2 SOLUTION

Nollars **Layer 2** uses rollup technology to enable **faster** and **cheaper** transactions.

- The Nollars Layer 2 solution has been designed to overcome ethereum layer 1 scalability issues.

Powered by rollup technology (Optimistic Rollups and ZK-Rollups), Nollar's Layer 2 is capable of processing thousands of tx/s at only a small fraction.

Greatly suited for large volume use-cases such as memecoin trading, decentralized exchanges (DEXs), and dApps.

- The bridge will enable users to move assets from L1-Ethereum → L2-Nollars Network or the other way around in a safe manner.

Users enjoy the speed that Layer 2 offers, but this bridge keeps the security of Layer 1 in tact.

**NollarsDAO** allows token holders to **govern the project** and **manage the treasury**.

- NollarsDAO is the community governance framework that will be responsible for all critical Nollars ecosystem decisions.

The Tally Protocol enables all token holders to vote on proposals, propose changes and make decisions regarding the treasury.

After the launch of token and Layer 2 solution, the Nollars will give up control of the project to community.

- Aside of governance, NollarsDAO will help in project treasury control to monitor over the accessible funds for ecosystem advancement budgeting projects, developer grants and marketing.

# Tokenomics

## \$NOLA SUPPLY

### Total Supply of Nollars \$NOLA.

|                |               |                  |  |
|----------------|---------------|------------------|--|
| Presale        | <b>53,33%</b> | <b>8,000,000</b> | 10 rounds, gradually increasing price  |
| NollarsDAO     | <b>26,67%</b> | <b>4,000,000</b> | Includes Ecosystem Development, Partnerships, and Treasury for project growth and sustainability |
| CEX Wallet     | <b>10,40%</b> | <b>1,560,000</b> | Token needed for CEX liquidity   |
| Liquidity Pool | <b>9,60%</b>  | <b>1,440,000</b> | Listing rate of \$0.83 per token   |
|                | 100%          | 15,000,000       |  |

## PRESALE BREAKDOWN

Details of the **10-round** Nollars token presale, including pricing and distribution.

The Nollars token presale will occur in 10 rounds, with each round offering tokens at an increasing price.

Early investors benefit from lower entry prices, while later investors help secure liquidity for the project.

|                   |                         |
|-------------------|-------------------------|
| Round 1           | <b>\$0.50</b> per token |
| ⋮                 |                         |
| Round 10          | <b>\$0.80</b> per token |
| Total Tokens Sold | 8,000,000               |

The funds raised will be used for ecosystem development, liquidity provisioning, and treasury reserves.

# Governance

## GOVERNANCE PARTICIPATION SETUP

How to vote on proposals and submit ideas using NollarsDAO governance.

After purchasing Nollars tokens, you can participate in the community-driven governance through NollarsDAO.

Here's how:

1. Access the NollarsDAO governance dashboard.
2. Connect your wallet to participate in voting.
3. Vote on active proposals: Based on the number of tokens you hold, your vote will help decide future developments.
4. Submit proposals: If you have ideas or initiatives to improve the ecosystem, you can submit them for community voting.

This process gives you a voice in shaping the future of the Nollars ecosystem.

Learn how to use **Tally Protocol** to vote and propose changes in NollarsDAO.

The Tally Protocol is a decentralized voting system that allows Nollars token holders to participate in governance.

Here's how it works:

1. **Submit proposals:** Any community member can submit a proposal for review.
2. **Vote on proposals:** Token holders can vote based on the amount of Nollars they hold.
3. **Implement decisions:** If a proposal passes, the NollarsDAO executes the decision.

Voting ensures that the future of Nollars remains in the hands of the community.

## TREASURY OVERVIEW

NollarsDAO uses **Gnosis Safe** multisig wallets to secure the treasury.

NollarsDAO's treasury is secured using Gnosis Safe, a multisignature wallet system.

This ensures that any movement of funds requires multiple approvals from trusted signatories, adding a robust layer of security.

The treasury manages funds allocated for:

- Developer Grants
- Marketing and Partnerships
- Ecosystem Development

By securing the treasury with Gnosis Safe, NollarsDAO ensures transparency and security in all financial decisions.

# Roadmap

## PHASES

The **future rollout** and **roadmap** of Nollars Token.

### PHASE 1

## Genesis of Smart Contract

Token launch on Ethereum to establish a secure foundation.

### PHASE 2

## Milestone and Publicity

Building awareness, CEX listings, and community engagement.

PHASE 3

## Nollars Network Layer 2 Launch

Deployment of the Nollars Network, blockchain explorer and cross bridge.

PHASE 4

## Community Growth and Engagement

Strategic marketing and influencer partnerships to boost community growth.

PHASE 5

## Decentralized Governance

The founders leave the project. Launching decentralized governance via Tally protocol to give the holders control over project decisions.

PHASE 6

## Nollars DAO Treasury

After the governance is in place, election of the signer of the Nollars Treasury.

PHASE 7

## DeFi Integrations and Partnerships

Nollars DAO will have access to the treasury to grant development funds to any project of their choice, if built on the Nollars Network.

The founders will leave once all tools and chains are deployed.

Nollars is dedicated to promoting a culture of continuous innovation, sustainable growth, and community enrichment.

Our carefully developed roadmap serves as a guiding framework for achieving success, advancing decentralized finance, and seamlessly integrating Nollars into a variety of platforms and ecosystems.

The NollarsDAO and treasury will govern independently.

PHASE 8

## Global Adoption and Recognition

Expanding Nollars Network global presence through partnerships, educational initiatives, and huge marketing.
